

Vinh Nguyen

Mobile Developer (React Native / Flutter)

vinhnt.work@gmail.com — 0938 791 640 — HCMC, Vietnam

Portfolio: <https://vapnguyen24.github.io/portfolio/>

Summary

I am a mobile app developer who is passionate about turning creative ideas into real-world mobile applications. With experience in both cross-platform and native development for Android and iOS, I focus strongly on performance, stability, and user experience. Every product I build is designed to be smooth, intuitive, and scalable for long-term growth.

Technical Skills

Languages: JavaScript, TypeScript, Dart, Java, Kotlin

Frameworks: React Native, Flutter, Android Native

Tools: Git, Firebase, WebRTC, Docker

Architecture: Clean Architecture, MVVM

Work Experience

Mobile Developer – Industrial Embedded Solutions

Aug 2023 – Present

HCMC, Vietnam

- Developed mobile apps using React Native and Flutter.
- Integrated WebRTC for screen casting and video streaming.
- Optimized performance and reduced app startup time by 30%.

Intern Developer

Aug 2023 – Dec 2023

- Built Android modules using Kotlin and Java.
- Maintained RESTful APIs and mobile UI.

Projects

Screen Casting System (WebRTC)

- Built sender (React Native) and receiver (Android Native).
- Implemented signaling server using Node.js.
- Supported audio + video streaming over LAN.

Reward System App

- Designed UI and business logic for customer reward system.
- Integrated REST APIs and push notifications.

Languages

- Vietnamese: Native
- English: Intermediate
